

December 22, 2017

Dear Valued Shareholders,

The past year has been very exciting for our team. In the last six months, Global PoleTrusion Group has gone from not only a private to a public entity but also from a design office to a firm that offers renewable energy globally.

During this process, we merged with Novacab International Inc., and we have taken the opportunity to reorganize our structure to better adapt to our core business model.

We've also been negotiating several new contracts, ensuring that they are well planned and ready to execute.

The growing success of our company is due to the expertise, commitment and drive of each member of our high-quality team. I am grateful to be surrounded by the best in each discipline – a small group of people who are as dedicated to the success of the company as I am.

In the next few months, our shareholders will reap the fruits of our labor, thanks to reputable clients, well-prepared contracts and the right partnerships. These factors will help us execute our projects and deliver the highest quality products, whether they be distribution poles, transmission towers or renewable energy networks.

I would like to thank those who have trusted us throughout this process. In the New Year, we look forward to providing you with regular updates on our progress and activities. Most of the clients in our network are part of governmental divisions and unfortunately, we are not always able to share news about them due to confidentiality agreements; nevertheless we will provide you with as much information as possible.

Wishing you all the best for the New Year.

Ramiro Guerrero  
President/CEO  
Global PoleTrusion Group Corp
